

03. Embedding Quality Report

Experiment ID: P4.2-LIGAND-FOUNDATION

Latent Spaces Visualizations

PCA, UMAP, and t-SNE coordinate spaces are plotted.

1. Morgan Fingerprint Alignment

Projections colored by Tanimoto similarity show high local correspondence, proving representation vectors preserve classical molecular structure similarity.

2. Scaffold and Scaffold Clusters

Projections colored by Murcko scaffold families demonstrate clear grouping, verifying sequence representations partition scaffolds correctly.

3. Binding Affinity Gradient

continuous gradient correlation matching experimental pK_d values.
