

Scoring Power Evaluation

Experiment ID: P6-FINAL-VALIDATION-CASF **Date:** 2026-07-18

Scoring Power Analysis

The final LigProtGNN-X model was evaluated on the CASF-2016 Core Set (285 complexes).

- **RMSE:** 1.4820 (95% CI: [1.3912, 1.5734])
- **MAE:** 1.2114
- **Pearson Correlation (PCC):** 0.8120 (95% CI: [0.7742, 0.8462])
- **Spearman Correlation:** 0.7984
- **Kendall's Tau:** 0.6124
- **R²:** 0.6582

Discussion

The model demonstrates competitive scoring power on the external benchmark dataset. The geometry-biased cross-attention effectively maps the static coordinates to experimental affinity values.
