

Evidential Calibration Report

Experiment ID: P6-FINAL-VALIDATION-CASF **Date:** 2026-07-18

Evidential Calibration Analysis

- **Expected Calibration Error (ECE):** 0.0892
- **Adaptive ECE (AECE):** 0.0824
- **Expected Normalized Calibration Error (ENCE):** 0.0984
- **Negative Log-Likelihood (NLL):** 1.9124

The evidential Normal-Inverse-Gamma (NIG) distribution provides well-calibrated confidence boundaries, preventing high confidence on predictions with high errors.
